SUMMARY

Product-focused Full-Stack Engineer with 10+ years experience taking web and mobile products from 0 to 1 and 1 to n, blending hands-on MERN/AWS development with end-to-end product management and a proven track record of scaling products to millions of users while delivering double-digit cost savings.

SKILLS

Javascript, Typescript, Node.js, Solidity, React, Next.js, jQuery, ReactNative, Express, Apollo GraphQL, Serverless, MySQL, Postgres, MongoDB, DynamoDB, Redis, Webpack, Gulp, SCSS, Apache, Nginx, Netlify, Vercel, Cloudflare, AWS EC2, Elastic Beanstalk, Lambda, SQS, SNS, S3, ElastiCache, RDS, AWS CDK, Wordpress, Supabase, NestJS, Eventbridge

WORK EXPERIENCE

Viva Chefs **Dec 2024 - Present**
Remote
Senior Full Stack Engineer

- Drove end-to-end feature delivery across the marketplace, expanding the booking engine (recurring reservations, calendar sync), escrow-based payments, and shipping dozens of customer- and chef-facing enhancements that boosted reliability and adoption
- Built a self-serve dashboard and automation layer that cut operations team's effort by 50%, slashed payment reconciliation time, and enabled the team to scale much faster to new markets
- Championed reliability and robustness of the platform with CI/CD pipelines, leading code reviews, and mentoring junior developers

Parcel Tech **Oct 2021 - Oct 2024**
Remote
Senior Full Stack Developer

- Co-authored an Ethereum Smart Contract using Solidity for off-chain bulk authorization and atomic execution of payments, deployed across major EVM networks
- Architected and implemented a full-stack payment infrastructure using Node.js/Express/MongoDB backend and Next.js frontend, processing over \$500M+ in on-chain transactions
- Led an engineering team in delivering multiple sub-products from concept to production using Typescript, React, React Native and Node.js
- Engineered a comprehensive on-chain transaction bookkeeping system using Node.js, Express.js, deployed on AWS EC2, SQS, and MongoDB
- Owned end-to-end product management responsibilities including user research, roadmap planning, design collaboration, Quality Assurance and sprint planning while leading technical delivery

The Rowdy Club **May 2018 - Oct 2021**
Hyderabad, India
Lead Developer

- Re-platformed a monolithic PHP/MySQL e-commerce site to full MACH architecture using Node.js, DynamoDB, API, Cloud-native CDK infra, and a headless React storefront—cutting infra costs 95 % and scaling to > 2 M requests/hour.
- Shipped a logistics service that drove order-dispatch accuracy to 99.5 % +, and built an admin portal in React that reduced manual ops time 60 %
- Coordinated with a team of developers to develop, deploy and maintain a mobile e-commerce app built in React Native

First Show **Dec 2016 - Jul 2019**
Hyderabad, India
Web Developer

- Developed and maintained websites and landing pages for various clients using HTML, CSS, JS, and PHP.
- Involved right from Marketing Strategy and UI design stages, up until successful deployment and continuous maintenance.

Cove Venture **Oct 2015 - Nov 2016**
Guntur, India
Team Lead, Web development

- Developed and maintained websites built in PHP, MySQL, Wordpress and codeigniter for various clients.
- Developed dashboards for various in-house analytics tools in HTML, CSS and JS
- Developed an in-house CMS for easy development and reuse of components in client Websites using PHP, MySQL

PROJECTS

Hire Curated **Jun 2025 - Present**
AI-powered hiring assistant for Hospitality industry

- Built an AI-powered hiring platform using Next.js and TypeScript, with webhook processing, automated workflow orchestration, and AI candidate scoring to automate resume screening and reduce time-to-hire.

- Developed a scalable multi-tenant SaaS application with role-based access control, SMS interview automation, secure file handling, and logging/monitoring, supporting multiple companies and user roles with error handling and validation.
- Implemented workflow automation and integrations including job board feeds with performance optimizations, manual scoring workflows, email delivery, and system notifications, enabling seamless data synchronization and automated candidate processing.

Childearn

Jul 2025 - Jan 2026

Child skill development in Gated communities

- Built and deployed a React Native app for both Apple and Android with real-time listeners, retry logic for network resilience, rate limiting, and comprehensive error handling
- Developed a scalable serverless API service on AWS (Lambda, DynamoDB, S3, SQS, EventBridge) with event-based and cron-based workflows triggering PDF generation, activity scheduling and community based validation, supporting thousands of concurrent users across multiple communities.

Chitti

Jul 2021 - Oct 2021

Newsletter publication and distribution platform

- Built the APIs and backend functionality for the application using Next.js and Mongoose
- Developed the UI of the website using Next.js and styled components
- Designed the UI for website and the Creator dashboard on Sketch

Middle Class Fund

Apr 2020 - Jul 2020

Tech stack for a COVID crisis relief fund

- Designed the operational flow and developed a Volunteer dashboard using React, deployed on Netlify.
- Built the backend in Node.js, Express and serverless framework deployed on AWS lambda, using MongoDB as database.
- Scaled the architecture to handle peak influx of requests from the foundation's website using SQS.

EDUCATION

G. Pulla Reddy Engg. College

Aug 2011 - May 2015

Bachelor of Technology

CERTIFICATIONS

Amazon Web Services - AWS

Certified Cloud Practitioner
